Course Description

Essbase is an amazing technology solution that allows companies to store and calculate data quickly. Using Smart View, Essbase provides data quickly to users using a common Excel interface. This Cloud solution will reduce your analytics and administration time, increase the timeliness of information, draw out key information elements important to your organization, and improve business decisions.

This training course will walk you through how to build an Essbase 21c cube from start to finish. We'll also cover both web and Excel interfaces and how to maintain cubes. Knowledge is gained through material review and hands-on exercises. This course is tailored for new Essbase administrators with no Essbase experience.

Course Outline

- Introduction to Essbase 21c
- Smart View Basics
 - Connecting to Essbase
 - Ad hoc analysis (zoom, slice, and dice), member election, and Smart View options
